SoundDiver 3.0

Utrecht november 2000,

Beste SoundDiver gebruiker,

Het heeft even geduurd, maar nu is het dan zover: de updates SoundDiver 3.0 zijn bij ons binnengekomen. In de nieuwe SoundDiver kun je de volgende zaken verwachten:

Common Operation

- Look similar to LOGIC Audio 4.x; switchable to old SoundDiver 2.x look
- Key Commands window as in LOGIC Audio, including MIDI remote control, etc
- Tool Tips: quick info of parameter pointed to by mouse pointer. In editors, the parameter name and current value is displayed.
- Multi-column flip menus for easy selection of parameter values now also in Mac version

Setup

- For most devices, the icons are small photos of the devices

Memory Manager

- Optional display of the banks of only one or several data types
- When entries are deleted, SoundDiver still memorizes their names

Faderbox support

- remote-control of any editor object by any MIDI message (including SysEx)
 - Assignments can be made by drag-and-drop from a picture of the fader box's front panel to the editor, a "Learn" function, or manually
 - Motor faders and encoders/buttons with value display are updated automatically *
 - Fader boxes with a display above the controls show the current assignments *
 - While operating an assigned control, the display shows the parameter name and current value (can be disabled) *
 - supports several identical fader boxes, as the MIDI in port is taken into account
 - supports 7 and 14 bit values
 - supports absolute values (e.g. "radio buttons"), relative values (e.g. encoders, increment by button) and scaled values (e.g. faders, rotary knobs)
 - Assignments may be effective only if the corresponding editor window is open, or independent of that
 - Definable Assignment sets allow redefinition of assignments with a single button
- * This works only with dedicatedly supported fader boxes; currently CM Automation Motormix and Radikal Technology SAC-2k.

Nieuwe modules in vergelijking met versie 2.0x

- Access Virus b • Access Virus Indigo • Access Virus kb • Access Virus Rack • CM Automation Motormix • E-mu Carnaval • E-mu Orbit • E-mu Planet Phatt • Friend-Chip digi-ma•x 16 • Friend-Chip digi-ma•x 32 • Korg EA-1 • Korg ER-1 • Korg ES-1 • Korg i40M • Korg iS35 • Korg iS40 • Korg iS50 • Korg MS2000 • Korg MS2000R • Korg N1 • Korg N1R • Korg N5 • Korg N5EX • Korg NS5R • Korg NX5R • Korg Trinity pro V3 • Korg Trinity pro-X V3 • Korg Trinity V3 • Korg Triton • Korg Triton pro • Korg Triton pro-X • Line 6 Bass POD Pro • Oberheim OB-Mx • Radikal Technologies SAC-2k • Roland RD-500 • Roland TD-10 / TDW-1 • Roland VM-7100 • Roland VM-7200 • Waldorf Q • Yamaha CS6R • Yamaha CS6x • Yamaha Pro R3 • Yamaha S30 • Yamaha S80

Handleiding en Software

De handleiding is 475 pagina's dik. De SoundDiver 3.0 software staat compleet op CD en een floppy(drive) is niet meer nodig.

Afbeeldingen in kleur van SoundDiver 3.0 en een gedetailleerde uitleg over de nieuwe modules zijn te zien op onze website <http://www.mopro.nl>. Bezoek de Mopro site regelmatig voor actuele informatie.

De SoundDiver 3.0 update kun je bestellen door fl 129,- over te maken op Postbank 34.86.771 of ABN-AMRO 48.80.90.598 ten name van MOPRO / R. Purnot BV met vermelding SD3. Woon je in België, maak dan 2.580 bef over op de BBL 310-1604162-62 in Brussel. Na ontvangst van de betaling en de authorisatie diskettes of CD, sturen we de SoundDiver 3.0 update per omgaande toe.
